THE AUTOMOBILE - A GRIPPING STORY

The demand for higher speed, more safety, sophisticated technology and more comfort significantly determines the development of automotive engineering. To meet these demands the automotive industry needs a strong and reliable partner for efficient and economical manufacturing processes. For a century we have been combining experience, technology and innovation into success worldwide.

Whether hydraulic or pneumatic chucking tools for the clamping of engine blocks, cylinder blocks, cylinder crank-cases, rear axles, axle stubs, axle housings, rear axle driving shafts, clutch housings and crankshafts. Or chucking tools for rotationally symmetrical parts to be produced such as wheels, differential housings, crankshaft bearings, driving shafts, wheel bearings or gear wheels.

RÖHM – EFFICIENT SOLUTIONS FOR THE MOST INDIVIDUAL REQUIREMENTS

The specific needs of our customers require individual and economical solutions. Over decades RÖHM has earned it's automotive partners' greatest confidence and trust with regard to competency, quality and reliability:
