NEW + SUPER FAST

# Your power chuck is ready for action in no time.

# RÖHM FAST-LANE SERVICE.

START PRODUCTION SOONER!

# Matching Adapters and Flanges for Your Power Chuck in Record Time.

Machine tools and power chucks are available with a variety of interface configurations. As a result, installation typically requires a draw tube adapter and, in many cases, a machine-specific mounting flange. Until now, manufacturing these components often involved production times of up to eight weeks. With the RÖHM FAST-LANE SERVICE, these waiting times are significantly reduced. For standard power chucks, most common interface configurations are already available in our system, allowing matching draw tube adapters to be manufactured at short notice and typically shipped within seven business days. If a mounting flange is also required, it is designed based on the machine specifications. Typical production time is only two to four weeks, which is considerably shorter than conventional production times. This means the required mounting components are available much sooner, reducing machine commissioning time and enabling an earlier start to production.

## FIVE GOOD REASONS TO CHOOSE THE FAST-LANE SERVICE:

*Flange and Draw Tube Adapter*

**1** MINIMIZED DOWNTIME
Shorter lead times, faster machine availability

**2** 7-DAY PRODUCTION
Standard power chuck with machine-specific draw tube adapter

**3** FAST FLANGE PRODUCTION
Matching flanges in just 2 to 4 weeks

**4** TIME SAVINGS
Chuck purchase and adapter order processed in parallel

**5** ONE-STOP SOLUTION
Genuine RÖHM components with guaranteed fit and compatibility

| Component | Interface | Available Chuck Sizes | Pricing |
|---|---|---|---|
| **Adapter** | - | 160, 200, 250, 315, 400, 500 | TBA |
| **KK-Flange** | KK/ZA | 160, 200, 250, 315, 400, 500 | TBA |
| **ZA-Flange** | ZA/ZA | 160, 200, 250, 315, 400, 500 | TBA |

## WHAT RÖHM NEEDS TO KNOW.

- Complete spindle drawing, including cylinder
- Details of the draw tube connection and chuck mounting interface
- Thread specification of the draw tube connection
- Maximum and minimum stroke positions
- Chuck mounting interface
- Mounting bolt thread specifications
